Statistics software: SAS, SPSS, R, Epi-info

COUNTRIES OF WORK EXPERIENCE

Senegal, Guinea, The Gambia, USA

LANGUAGES

Fluent in French, English and Two West African vernaculars (Wolof and Fulah)

CITIZENSHIP

Naturalized US citizen since 2006

PROFESSIONAL EXPERIENCE

2013-now   Wisconsin Department of Health Services   Madison, WI

- Actually working as the Chief epidemiologist for the Office of Heath Informatics on population health and clinical data from healthcare records and providing population based surveillance and quality measures.
- Support Data Governance and Accreditation effort at the state level and staff the Data Governance Board with regards to access and release of DPH data.
- Lead the DPH Epidemiology Advisory Team and provide guidance in Data Governance, research design and analytics to DPH li
- Provide technical and programmatic assistance to the Section Chief and Office Director in the strategic alignment of OHI's clinical data information functions to support DPH Bureaus and programs
- Provide training and technical assistance to epidemiologists, fellows and interns at DPH in health informatics.

2006-2013   Iowa Department of Public Health   Des Moines, Iowa

- As a State epidemiologist for the division of substance abuse, vital records, and disability, I coordinated the data collection, analysis and dissemination for the department.

- Chair of the State Epidemiology Workgroup and gave epidemiological support to the Governor's Advisory Council on Brain Injury (ACBI), Prevention of Disability Policy Council (PDPC), and Trauma System Advisory Council (TSAC).

2004-2006   Iowa Department of Public Health   Des Moines, Iowa
Fellowship
- Coordinated Iowa's community health centers in disaster preparedness and mental health readiness. Developed mental health competencies for health care workers in emergency and disaster. Mentored a MPH student from the University of Iowa during her internship
- Volunteered as a data analyst using SAS software in the Comprehensive Assessment of Rural Health in Iowa (CARHI project), which is a comprehensive surveillance of health conditions and environmental exposures in rural areas with the collaboration of the CDC and the University of Iowa.
- Helped an Epidemiology Intelligence Services (EIS) officer from the CDC in a retrospective study of the survival of HIV patients in Iowa.

Consultancy
Provided service to the St Louis University Nephrology department in assessing the survival of transplant patients with Ig.A Nephropathies compared non-Ig.A Nephropathies. We used SPSS for that purpose.

1994-2000   The Medical Relief   Dakar, Senegal
Family practice office
Provided complete medical care as a private family-practice physician, offering free medical service to those who could not afford it. We also provided counseling for marriage, runaway children, and seasonal migrants, as well as STDs prevention services. Supervised two staff members, an office secretary and a midwife.

1993-1994   "Community Nutrition Program"   Dakar, Senegal
MD and Trainer
Financed by the World Bank, the program was aimed at the eradication of malnutrition through education of the general public. Directed the training of community health workers in early detection of malnutrition in children and pregnant women. Participated in the design and implementation of the program in its pilot phase in three different regions of Senegal (Dakar and Suburbs, Thies and Louga).
Elaborated a training manual for low level educated community health worker to communicate and counsel illiterate pregnant women in good nutrition practice using locally available and cheap crops.

1993   USAID & WHO   Dakar, Senegal
Consultant
"Evaluation of the Global Immunization Plan of 1998"
Provided technical support of evaluators, helped in the national cluster sampling and designing the survey. In 3 weeks we surveyed more than 50 villages in very remote areas with limited food and clean water. It was a very challenging experience physically and emotionally.
Survey of Medical Services effectiveness of management
Participated in the development of a retrospective study and audit of private medical clinics vs. public institutions (Hospitals, University Hospitals, and Women's Clinics) in assessing efficiency and adequacy of medical care. Directed the assessment of adequacy of prescriptions and diagnostic investigations. This comparative study was the cornerstone of the semi-privatization of public hospitals. We realized that private practices did not mean better medical care, and as a matter of policy the regional medical director was empowered to keep tract of the performance of private health care providers.
