Remote participation link: <https://go.wisc.edu/globalhealth-0924>

Passcode: grandround

The Department of Pediatrics Division of Global Pediatrics is honored to invite you to the keynote presentations during our upcoming Fundamentals of Global Health Graduate Medical Education Course. We welcome University of Wisconsin trainees, faculty, and staff to these sessions with the goal of promoting cross-communication, collaboration, and shared global health training opportunities on our campus.

The Fundamentals of Global Health Graduate Medical Education course occurs annually each fall, offering two weeks of intense global health training for residents and fellows with global health interests across the UWSMPH departments of Pediatrics, Internal Medicine, Obstetrics/Gynecology, Family Medicine, and Emergency Medicine.

This rare convening of residents, fellows, and faculty across disciplines allows attendees to engage in meaningful discussions related to global health topics; participate in global health simulations that portray clinical, cultural, and ethical scenarios encountered internationally; learn procedural-based skills tailored to resource-limited environments; and identify opportunities for global engagement and collaboration.

QUESTIONS? Please contact the course director, Nicole St Clair, MD, at nstclair@wisc.edu.
